This handout:

www.epmguidance.com/resources/pmimn2015.pdf

The slides:

www.epmguidance.com/resources/pmimn2015slides.pdf

Introductions

- Let's figure out who's in the room
 - Industries?
 - Has an existing PPM process
 - Has been mandated to create a PPM process
 - Hope to create a PPM process in the future

Today's Agenda

- Introductions
- What is PPM for you?
- Defining Project Portfolio Management?
- Defining a Project Prioritization Process
- Creating project prioritization
- Stage Gating
- Pairwise comparison exercise
- Automation of the PPM process
- Deploying Business Prioritization Process
- Pitfalls, Sinkholes and avoiding both

DISCUSSION

**WHAT IS
PROJECT PORTFOLIO MANAGEMENT
(OR PORTFOLIO PROJECT MANAGEMENT)
FOR YOU?**

The background features several flowing, wavy lines in shades of blue and white. A prominent dashed line curves across the upper portion of the image. The overall aesthetic is clean and modern, typical of a professional presentation slide.

WHAT IS PROJECT PORTFOLIO MANAGEMENT?

Defining Project Portfolio Management

- This is a highly topical subject, but what do we mean by it?
- Project Tracking at the summary level?
- Annual Budgeting?
- Project Grouping?
- Project Selection
- Product Lifecycle Management

Project Portfolio Management

PPM: Project Grouping

PPM: Project Dashboards

Name	Overall	Financial	Schedule	Risk	Scope
[-] Corporate					
[-] Finance					
[-] Human Resources					
[+] Information Technology					
[+] International					
[-] Marketing					
[-] Product Development					
Automated Hardware					
Focus Group Product					
Product Accessory Design					
Product Vision Team Expansion					
Value Chain Management					
[-] Sales & Marketing					
New Media Marketing Design					
[-] Operations					
Maintenance					
Production

DEFINING A PROJECT PRIORITIZATION PROCESS

Project Constraints

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

Ken Mattingly

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

What is project management?

“What is a project? It is an exercise of producing a defined result with insufficient resources.”

*Rear Admiral, Ken Mattingly
Apollo 13 Astronaut, VP Lockheed*

No prioritization? Then why have PM?

No one has an abundance of resources

...nor should they

Between 1999 & 2001 American
companies spent \$130 billion on
technologies never used

Mastering the Three Worlds of Information Technology
(Harvard Business Review, A. McAfee
Nov. 2006, pp. 141 -149)

PPM Selection survey

How are Projects Currently Selected in Your Organization?

Business Prioritization Workshop

Project Prioritization

- ❑ “When project initiatives are assessed only as a narrative, prioritization becomes a battle of narratives”.

- ❑ The result is that:
 - ❑ All projects are listed as priority 1
 - ❑ All projects have, in theory started
 - ❑ Prioritization is done on an ad-hoc basis

- ❑ The goal: “Find a process that breaks ties”

What do Executives need?

A sip from the firehose

What do Executives need?

- ❑ The biggest challenge for Business Decision Makers is the deluge of data; data from all sorts of various sources and in myriad formats.
- ❑ There is no shortage of data but a profound lack of knowledge and, by extension, of decision making ability
- ❑ Business Decision Makers want data volume decreased and decision making increased.

According to a survey done of 385 IT and Finance VPs, 82% do not possess information which is of sufficient quality, trustworthiness or usefulness to manage their operations.

Computing Canada, April 7, 2006

The background features several flowing, wavy lines in various shades of blue and white. A prominent dashed line curves across the upper portion of the slide. The overall aesthetic is clean and modern.

CREATING PROJECT PRIORITIZATION

Non-prioritized projects

As of Feb 1, 2010

The Portfolio Prioritization Process

- ❑ Identify Business Drivers
- ❑ Develop questionnaires for measurement in each category
- ❑ Determine the inter-driver impact through pairwise comparison
- ❑ Assess answers for the questionnaire for each project
- ❑ Calculate priorities based on the questionnaire answers
- ❑ Prioritize a summary schedule based on the priority listing and identify which projects would be done first based on the priority and which will not be accomplished based on limited resources
- ❑ Review the results and force projects into the priority list where required with the understanding that other projects would then not be completed.

Business Drivers vs KPI's

- ❑ **Business Drivers** are short sharp statements that express the shared focus of the organization in actionable terms.
- ❑ **Key Performance Indicators** are Measurements of past performance that empower management to action when results are not occurring as expected.
- ❑ **New Project initiatives** are based on **Business Drivers**

Rules for Business Drivers

- ❑ Choose 4 to 8 business drivers
- ❑ Have the drivers align to goals that are recognizable by all of management
- ❑ Include relevant managers in the selection and relevance of the business drivers (These are the same managers who are requesting projects)
- ❑ Look to your mission statement, strategic goals, current business challenges, global or regional initiatives to find business drivers

Business Driver Characteristics

- Business Drivers should be:
 - Measureable
 - Action oriented
 - Unique
 - Leveled
 - Attainable
 - Clear to all decision makers

Business Driver Examples

- Become the industry leader ← Actionable?
- Replace the mainframes ← Driver or Project?
- Enhance IT environment
- Grow number of new clients
- Increase clients ← Duplicate
- Reduce competition ← Not Attainable
- Increase employee retention and productivity ← 2 Drivers
- Grow change management capabilities
- Improve service delivery

Business Driver Matrix

	Improve Market Share	Improves customer satisfaction	Project Risk	Alignment to Strategy
Improve Market Share		Market Share is strongly more important than Customer Satisfaction	Market Share is Strongly more important than Project Risk	Market Share is Moderately more important than Alignment to Strategy
Improves customer satisfaction			Customer Satisfaction is Equal to Project Risk	Customer Satisfaction is Strongly less important than Alignment to Strategy
Project Risk				Project Risk is Moderately less important than Alignment to Strategy
Alignment to Strategy				

Improve Market Share

Increase market share by 10%

Improve customer satisfaction

Increase overall customer satisfaction by 10% as measured by the quarterly customer satisfaction survey

Project Risk

Exposure to project risk as assessed in our project risk matrix scoreboard

Alignment to strategy

Degree of alignment to one of the 4 key strategic goals as published by the board of directors for this year

Description	Score
Strongly more important than	9
Moderately more important than	3
Equal to	1
Moderately less important than	0.33
Strongly less important than	0.111

Business Prioritization Workshop

Business Driver Matrix Score

	Improve Market Share	Improves customer satisfaction	Project Risk	Alignment to Strategy
Improve Market Share		Market Share is strongly more important than Customer Satisfaction	Market Share is Strongly more important than Project Risk	Market Share is Moderately more important than Alignment to Strategy
Improves customer satisfaction			Customer Satisfaction is Equal to Project Risk	Customer Satisfaction is Strongly less important than Alignment to Strategy

Total:	35.321	100	8	103	198	293	388

Project Questionnaire

- Create multiple choice answers for fundamental questions to determine the impact of each project on each project driver:
 - Extreme
 - Strong
 - Moderate
 - Low
 - None

Driver Questionnaire Examples

Business Drivers	An initiative's impact on this driver is:
Enhance Quality of Products and Services	<p>Extreme – if it increases business partner satisfaction by $\geq 3\%$</p> <p>Strong – if it increases business partner satisfaction by $\geq 2\%$</p> <p>Moderate – if it increases business partner satisfaction by $\geq 1\%$</p> <p>Low - if it increases business partner satisfaction by $< 1\%$</p>
Improve Accuracy of Core Processes	<p>Extreme – if it improves FCI and DPMO by 33% on one process or 8% across all processes</p> <p>Strong – if it improves FCI or DPMO by 33% on one process or 8% across all processes</p> <p>Moderate – if it improves FCI or DPMO by 16% on one process or 4% across all processes</p> <p>Low - if it contributes to improve FCI or DPMO on one or more processes</p>
Reduce Cycle Time for Key Processes	<p>Extreme – if it improves cycle time by 25% in one process or avg. of 7% across multiple processes</p> <p>Strong – if it improves cycle time by 13% in one process or avg. of 4% across multiple processes</p> <p>Moderate – if it improves cycle time by 7% in one process or avg. of 2% across multiple processes</p> <p>Low - if it contributes to improve cycle time in one or more processes</p>
Effectively Manage Operational Risk	<p>Extreme – if it improves operational risk stability by $\geq 2\%$</p> <p>Strong – if it improves operational risk stability by $\geq 1\%$</p> <p>Moderate – if it improves operational risk stability by $\geq .5\%$</p> <p>Low - if it improves operational risk stability by $< .5\%$</p>
Enhance Transparency of Products and Services	<p>Extreme – if it increases transparency score in business partner satisfaction by $\geq 3\%$ -</p> <p>Strong – if it increases transparency score in business partner satisfaction by $\geq 2\%$</p> <p>Moderate – if it increases transparency score in business partner satisfaction by $\geq 1\%$</p> <p>Low - if it increases transparency score in business partner satisfaction by $< 1\%$</p>
Reduce Cost of Operations	<p>Extreme – if it reduces ongoing expense by $\geq \\$10\text{MM}$</p> <p>Strong – if it reduces ongoing expense by $\geq \\$5\text{MM}$</p> <p>Moderate – if it reduces ongoing expense by $\geq \\$3\text{MM}$</p> <p>Low - if it reduces ongoing expense by $< \\$3\text{MM}$</p>
Create Opportunities for New Revenue	<p>Extreme – if it provides revenue growth opportunities for 4 or more bus. partners</p> <p>Strong – if it provides revenue growth opportunities for 3 or more bus. partners</p> <p>Moderate – if it provides revenue growth opportunities for 2 or more bus. Partners</p> <p>Low - if it provides revenue growth opportunities for 1 or more bus. Partners</p>
Improve Associate Satisfaction	<p>Extreme – if it reduces turnover by $\geq 1.35\%$ and increases associate satisfaction by $\geq 1\%$</p> <p>Strong – if it reduces turnover by $\geq 1.35\%$ or increases associate satisfaction by $\geq 1\%$</p> <p>Moderate – if it reduces turnover by $\geq .7\%$ or increases associate satisfaction by $\geq .5\%$</p> <p>Low - if it contributes to reducing turnover or increasing associate satisfaction</p>

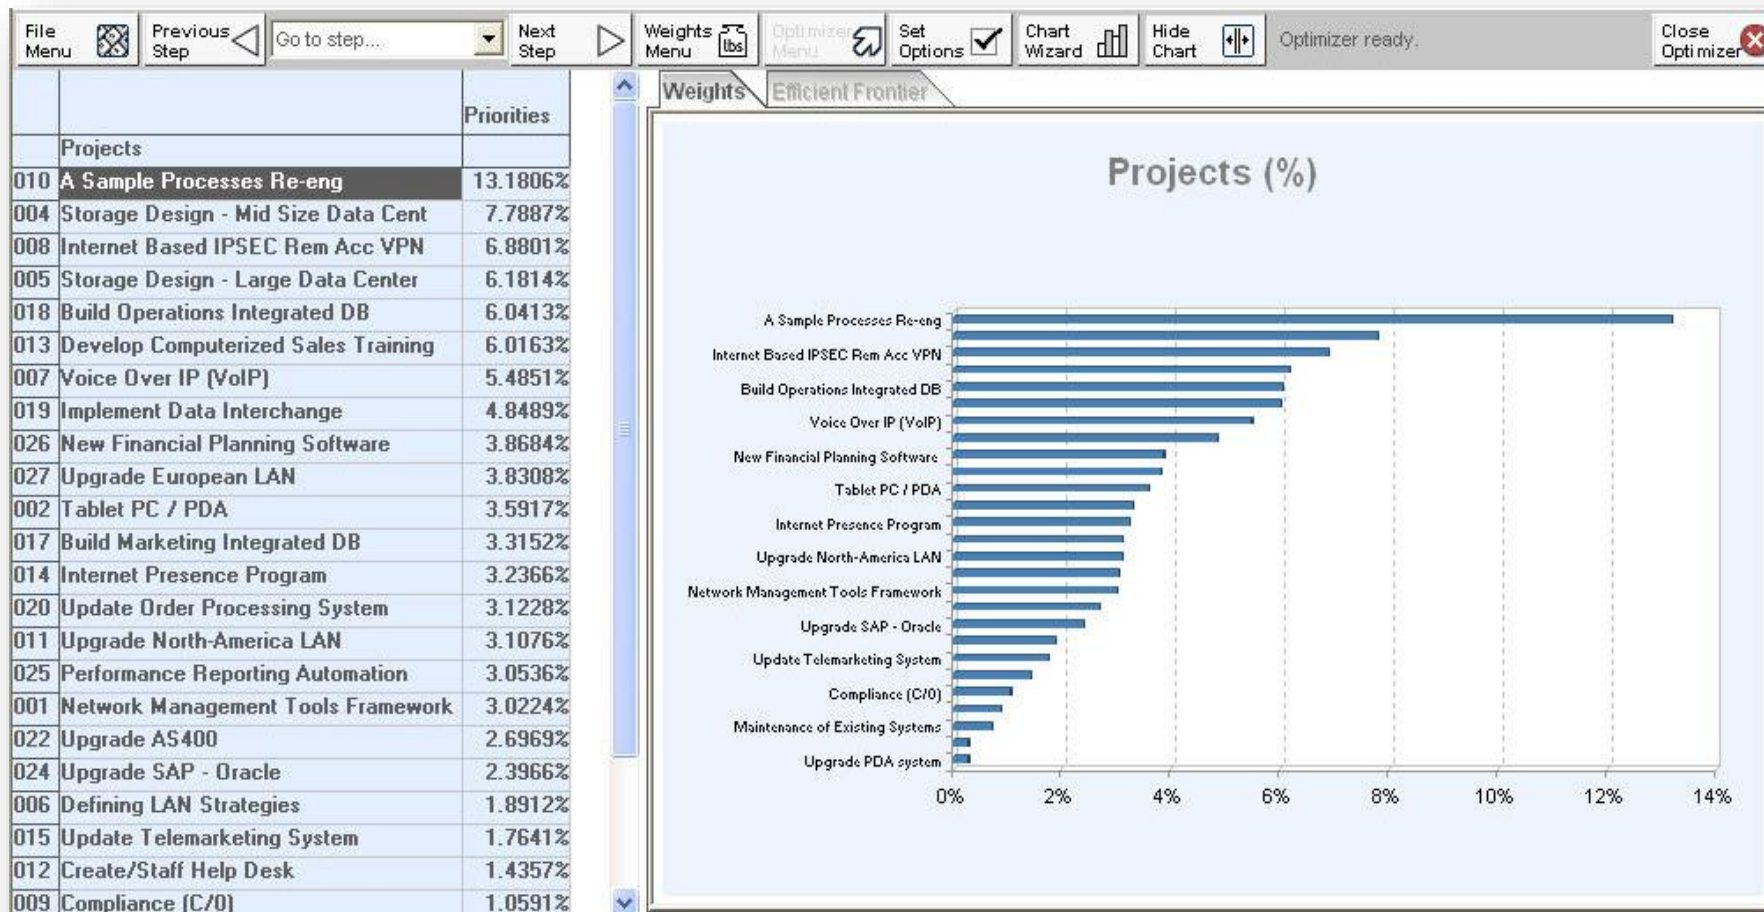

Real World example of questionnaire

Compliance	Extreme threat	Threat to the institution's existence or major criminal or civil liability
	Strong threat	Threat to the institution's reputation
	Moderate threat	Threat to operational requirements
	Weak threat	Threat of minor sanctions
	No threat	Does not affect Compliance
Strategic Need	Extreme Benefit	Strategic objective cannot be performed without this project
	Strong Benefit	Strategic objective would be significantly advanced
	Moderate Benefit	Strategic objective would be advanced
	Weak Benefit	Strategic objective would be slightly advanced
	No Strategic Benefit	There is no strategic benefit
Operational Business Need	Extreme Benefit	Function cannot be performed without this project
	Strong Benefit	Operational efficiency and/or quality would be significantly improved
	Moderate Benefit	Operational efficiency and/or quality would be improved
	Weak Benefit	Operational efficiency and/or quality would be slightly improved
	No Business Benefit	There is no operational business benefit
Risk	No Risk	Risk is not a factor in this project
	Minimal risk	There are minimal risks to this project
	Some unknowns	This project has some unknowns. There is a slight probability this project will be over time and over budget
	Skills unavailable	The skills required to complete this project are weak or unavailable internally. There is a significant probability this project will be over time and over budget
	Extreme risk	There are many unknowns of technology and/or architecture. There is a significant probability this project will not be successful
Number of Stakeholders	All	Affects every stakeholder in the institution
	More than 10,000	Affects more than 10,000 stakeholders
	More than 5,000	Affects more than 5,000 stakeholders
	More than 1,500	Affects more than 1,500 stakeholders
	Less than 1,500	Affects less than 1,500 stakeholders

STAGE GATING

Ongoing prioritization

- We've just covered project selection and initiation so far, but if we go any further, it's worth talking about stage-gating.

Stage-gating

- ❑ The term Stage Gate was coined in Montreal at McGill University
- ❑ The concept was the result of the study of the effective practices of a large number of organizations by Dr. Robert Cooper

Business Prioritization Workshop

Can you cancel a project?

Cancel a project?

If you can't cancel a project, the
value of PPM becomes
questionable

PPM Pitfalls

- ❑ “We have stage gating, it’s just that all the gates are open”
- ❑ “We have project cancelling criteria, we’re just not allowed to cancel the project”
- ❑ My compensation is tied to the success of this project, not its cancellation

Quitting? It's not in our nature!

- ❑ Project Managers are hard-wired not to quit.
- ❑ We are the results oriented, challenge-motivated, never-say-die, make-it-happen, see-the-glass-half-full kind of people
- ❑ So it goes against the grain when someone wants to talk about cancelling a project.
- ❑ Cancel? I want to be in the session where we save the cancelled project.

It'll make it...

We're the folks
who are cheering
for the boat to
make it over the
wave in the
movie
The Perfect
Storm

A note on giving up from H. Ross Perot

Most people give up just when they're about to achieve success. They quit on the one yard line. They up at the last minute of the game one foot from the winning touchdown.

H. Ross Perot

How do you know if it's time to stop a project?

When the Horse Dies:Dismount!

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

Beating a Dead Horse

Dakota tribal wisdom says that when you discover you are riding a dead horse, the best strategy is to dismount. However, project managers sometimes try some of the following ideas they:

- ❑ Change riders
- ❑ Buy a bigger whip
- ❑ Rename the horse
- ❑ Stay very quiet while on the dead horse and hope no one notices
- ❑ Appointing a committee to study the horse.
- ❑ Send the rider for additional training
- ❑ Outsource the riding of horses
- ❑ Do a study of dead horses
- ❑ Harness two or more dead horses together to see if the cart will go any faster
- ❑ Add funding to increase riding performance
- ❑ Say things like, "This is the way we have always ridden this horse."
- ❑ Automate the dead horse to see if software can make it ride faster
- ❑ Rewrite the description of horses to ensure yours can't be defined as either dead or even a horse
- ❑ Reclassify the horse as "living impaired"

Successful automation tips

- ❑ Don't automate until you know what you're automating (And don't let the tail wag the dog!)
- ❑ Process, process, process will always be more important than the look and feel of a screen
- ❑ Make sure you budget expertise (internal or external)
- ❑ ... and training
- ❑ ... and time.

The background features several flowing, wavy lines in shades of blue and white. A prominent dashed line curves across the upper portion of the image. The overall aesthetic is clean and modern, typical of a corporate presentation slide.

DEPLOYING BUSINESS PRIORITIZATION PROCESS

**SHARE YOUR DEPLOYMENT
EXPERIENCES FOR PPM**

Deploying Business Prioritization

- ❑ Common expectations
 - ❑ Technology will solve everything
 - ❑ It can be done by Friday... this Friday
 - ❑ All employees will adopt without objection
- ❑ It's not a technology project, it's change management
- ❑ Instituting organizational culture change

We all want PPM... don't we?

- ❑ It seems so desirable...
 - ❑ Integrated resource capacity planning
 - ❑ Executive-level real-time dashboards
 - ❑ Instant decision making
 - ❑ Improved efficiency
 - ❑ No more management-by-emergency

But what does it take?

Yes, an objective analytical approach to prioritizing our projects based on our business priorities sounds great but do you have what it'll take to deploy it as a culture?

Common expectations

- It will be ready instantly
- It is all about the technology
- It's just like we do now but on the Web
- No one will require training
- It will never affect my projects

Most common request

“We just bought this PPM Software product...
Can you come make it work?”

Our most common response:

“What would you like it to do?”

Most common reply

“Don’t you know?”

Establish deployment team

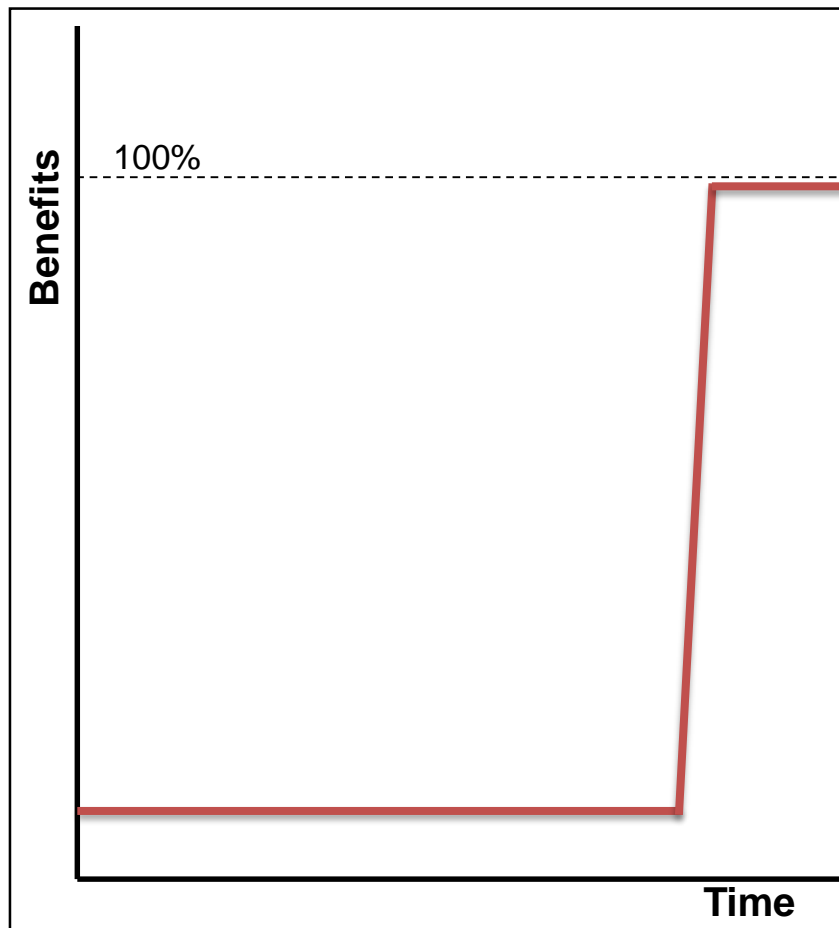

- ❑ Identify Key Stakeholders
- ❑ Identify internal expertise resources
- ❑ Engage external expertise (if required)

Identify Business Objectives

- ❑ Executive and Stakeholder workshops
- ❑ Identify management role impact
- ❑ Prioritize business objectives and create a Master Deployment Plan
- ❑ Establish milestones and metrics

Big bang or phased deployment?

Big Bang

Phased

Big Bang or Phased implementation?

Big Bang

- Better chance of reaching 100% of originally perceived benefits
- Better chance of reaching 0% of benefits because:
 - Project is cancelled
 - Team changes
 - Priorities change
 - Organization changes

Phased

- Better chance of not getting to 100%
- Chances of getting some benefits are close to 100%
- Secret is targeting the biggest initial benefit for the lowest risk

Phased deployments are lower risk

It's natural to want to push every vector at once

We ask:

“For the first phase, what is the minimal deployment, the deploying of which will return a positive return on investment every cycle going forward?”

The background features abstract, flowing lines in various shades of blue and white. A prominent dashed line curves across the upper portion of the slide. The overall aesthetic is clean and modern.

PITFALLS AND SINKHOLES

Montreal Sinkhole (2013)

Business Prioritization Workshop

Tampa Sinkhole (2013)

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

So... we're done... right?

- ❑ Sorry, no.
- ❑ Just because you know how to create a project prioritization process doesn't mean it will be adopted with open arms by everyone
- ❑ There are still barriers to overcome and pitfalls and sinkholes to avoid

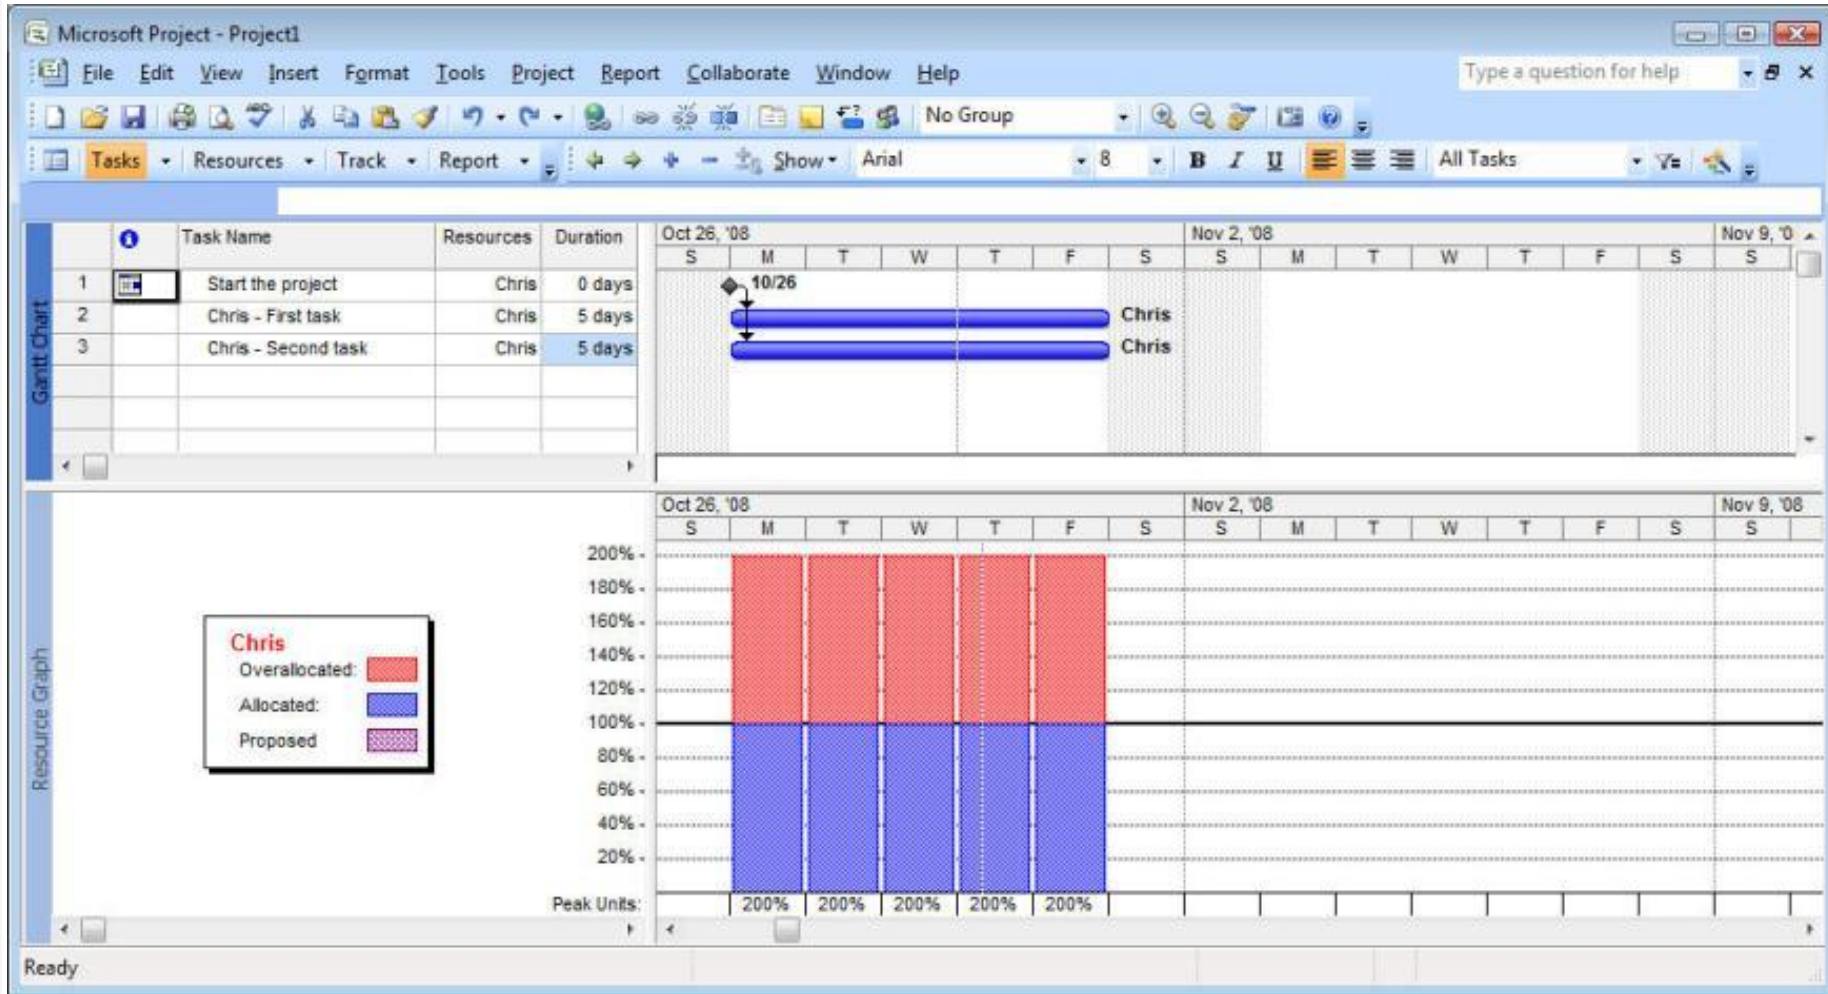

Challenges

- Resource Capacity Analysis and Management
- Nature's barriers to prioritizing
- Common pitfalls
- More pitfalls
- User resistance

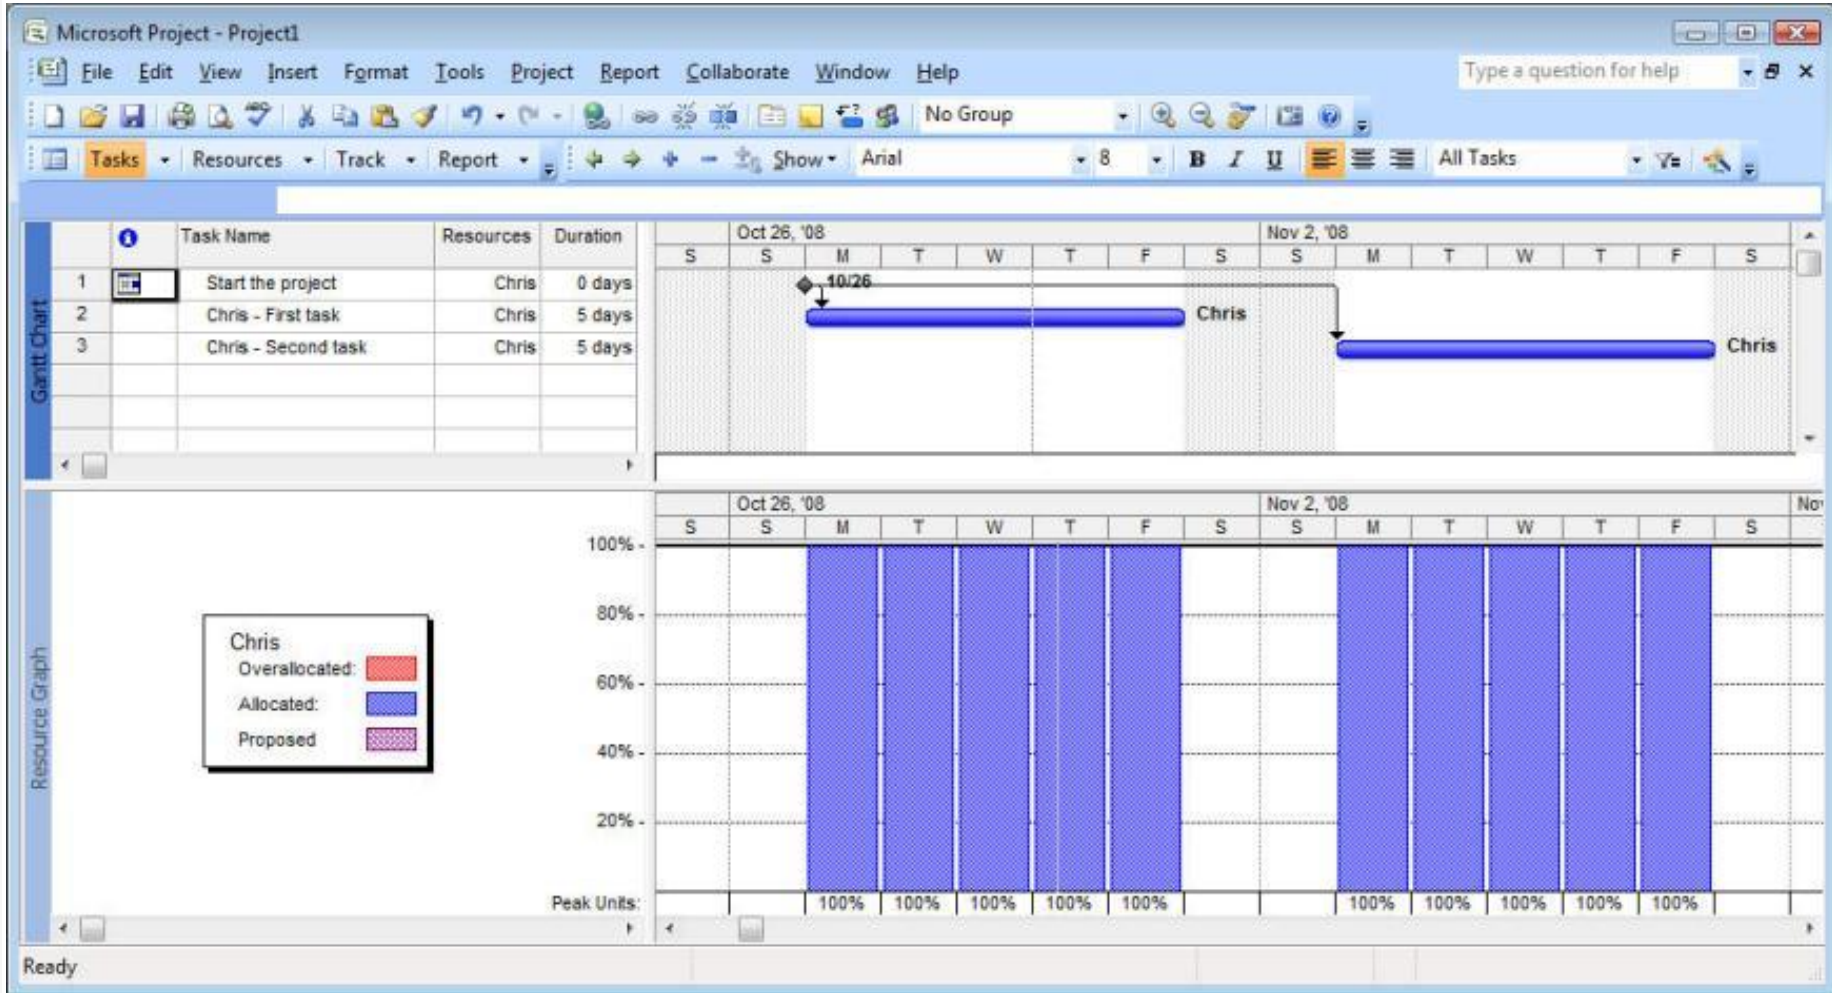

Resource Capacity Challenge

- Our end goals are to:
- Determine what projects can be accomplished
- Determine that we are doing the projects which will give the best return on investment to our organization
- Ensure that the most important projects get priority access to our resources
- So, shouldn't we resource level down to the individual?

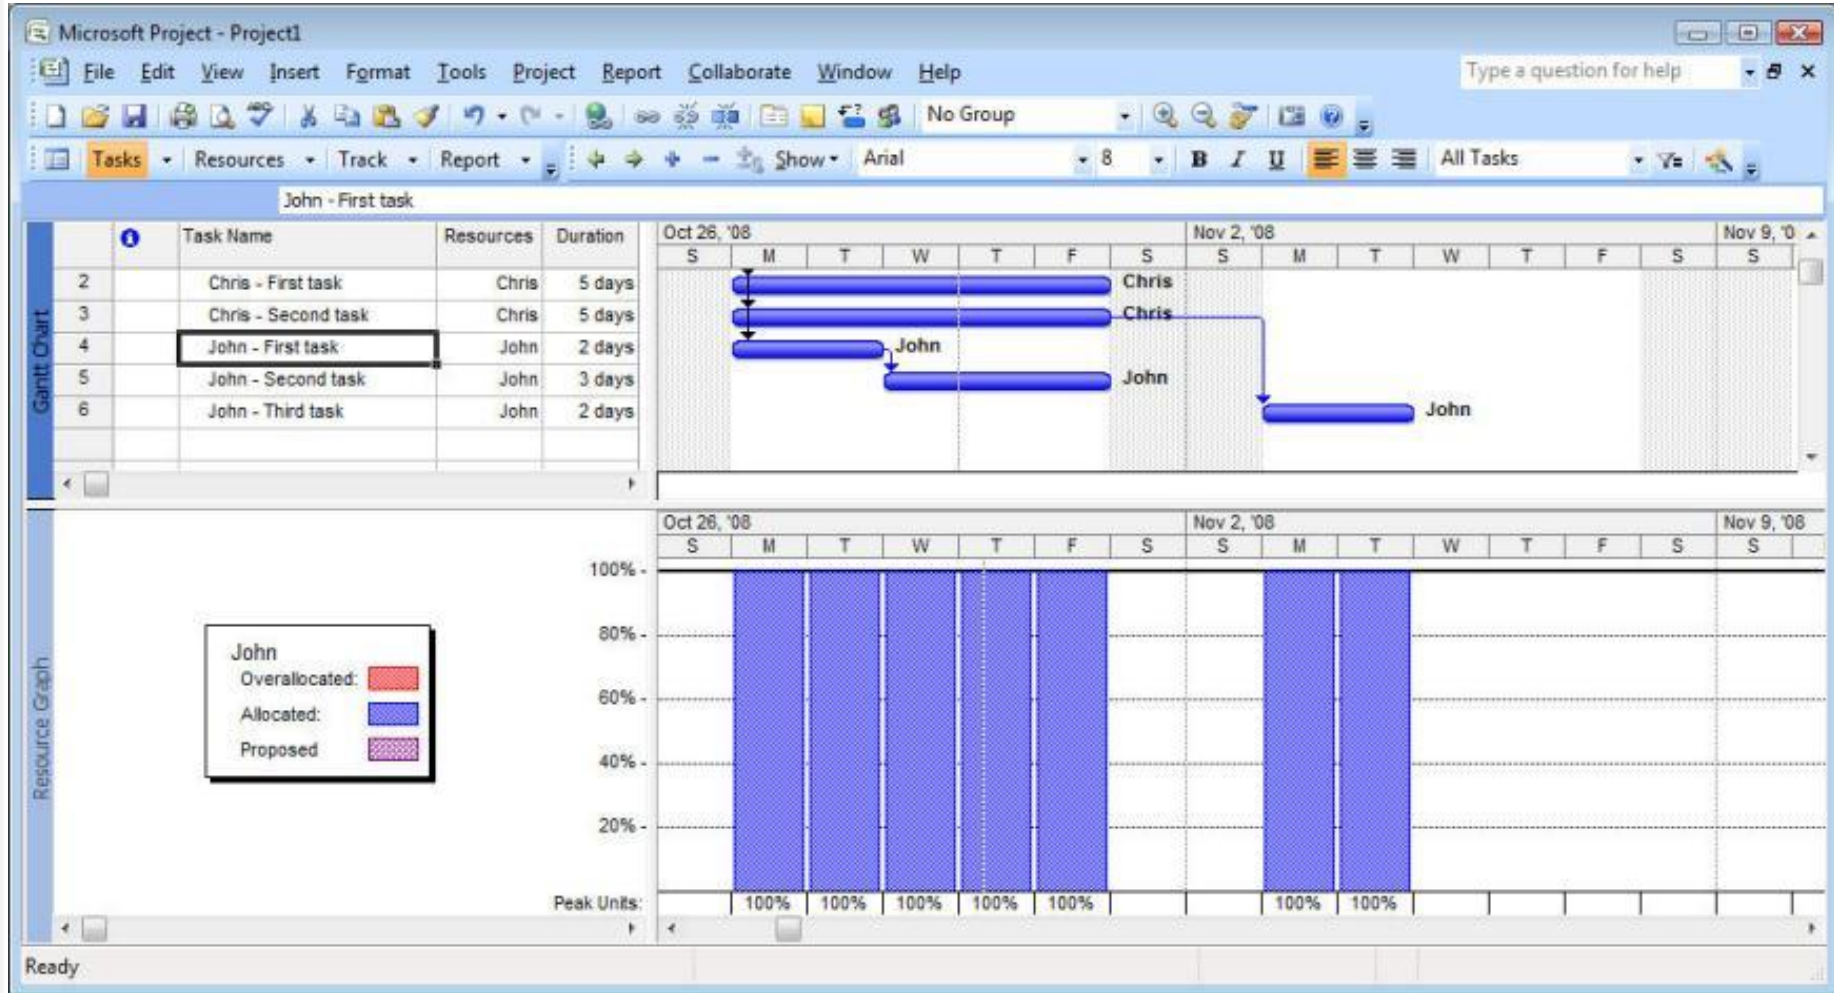

Individual Res Leveling challenge

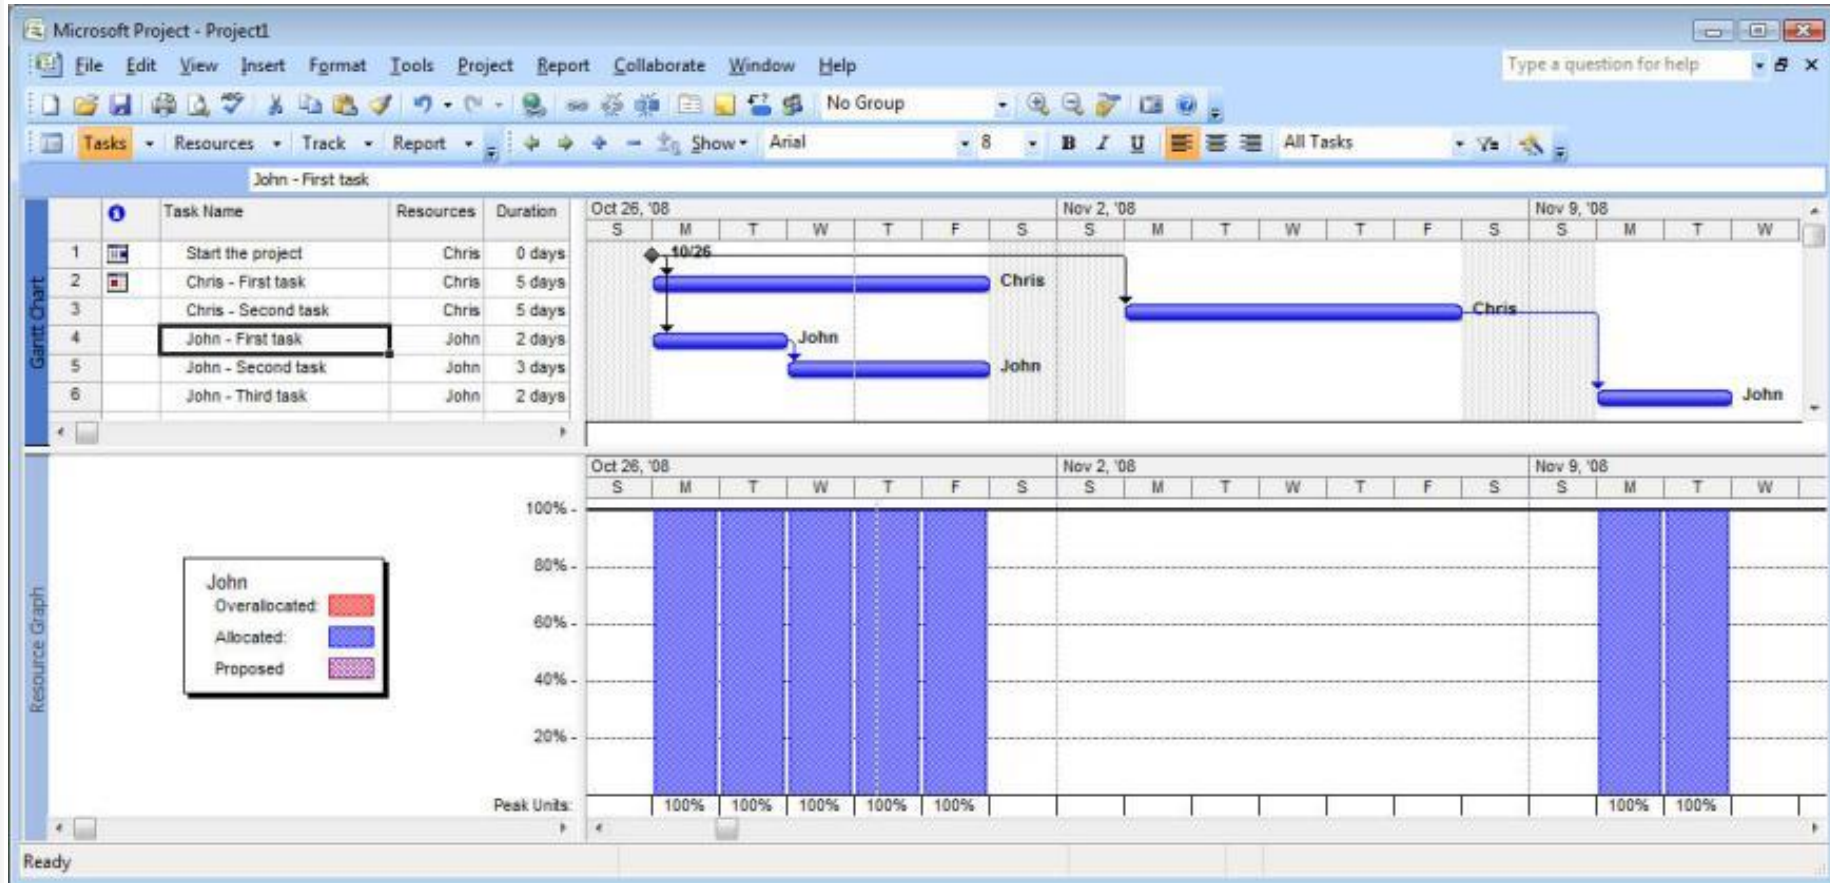

Individual Res Leveling challenge

Individual Res Leveling challenge

Individual Res Leveling challenge

Resource level from the top down

- Do your resource capacity planning from 30,000 feet
- Resource level first at the total manpower level
- Then, if successful, go to a skill/category level with a small number of skills/categories.

Nature's barriers to sharing

- ❑ Project managers have gotten used to controlling their own data. The advent of low-cost, easy-to-use pm tools means that virtually anyone can produce 1st class project reporting. Project managers like having the ability to do their own analysis before anyone in management sees it.
- ❑ As hard as it is to believe management in some organizations may actually punish those who deliver bad news.

Nature's barriers to prioritizing

“Tag. You’re it!”

- ❑ Even if they are not punished management in some organizations may inundate a project manager with questions and concerns if they could see project data in real time.
- ❑ No manager wishes to make their project a second priority. Everyone thinks their work is the most important possible.

Set the rules before the game starts

- ❑ Getting buy-in for a new procedure or the way data will come together is much easier if we are talking theoretically.
- ❑ Try to avoid establishing these rules on the fly with live production data.
- ❑ The problem with live data is that the impact of usage changes is instant and has a real and immediate effect on the very employees trying to establish an organizational standard.

Set Management's rules before they play

- ❑ Same goes for management. If we talk about general rules for prioritizing projects then there is a chance of getting them accepted.
- ❑ If we just try to prioritize existing projects, the emotional attachment to moving a project to anything other than top priority makes the exercise almost impossible.

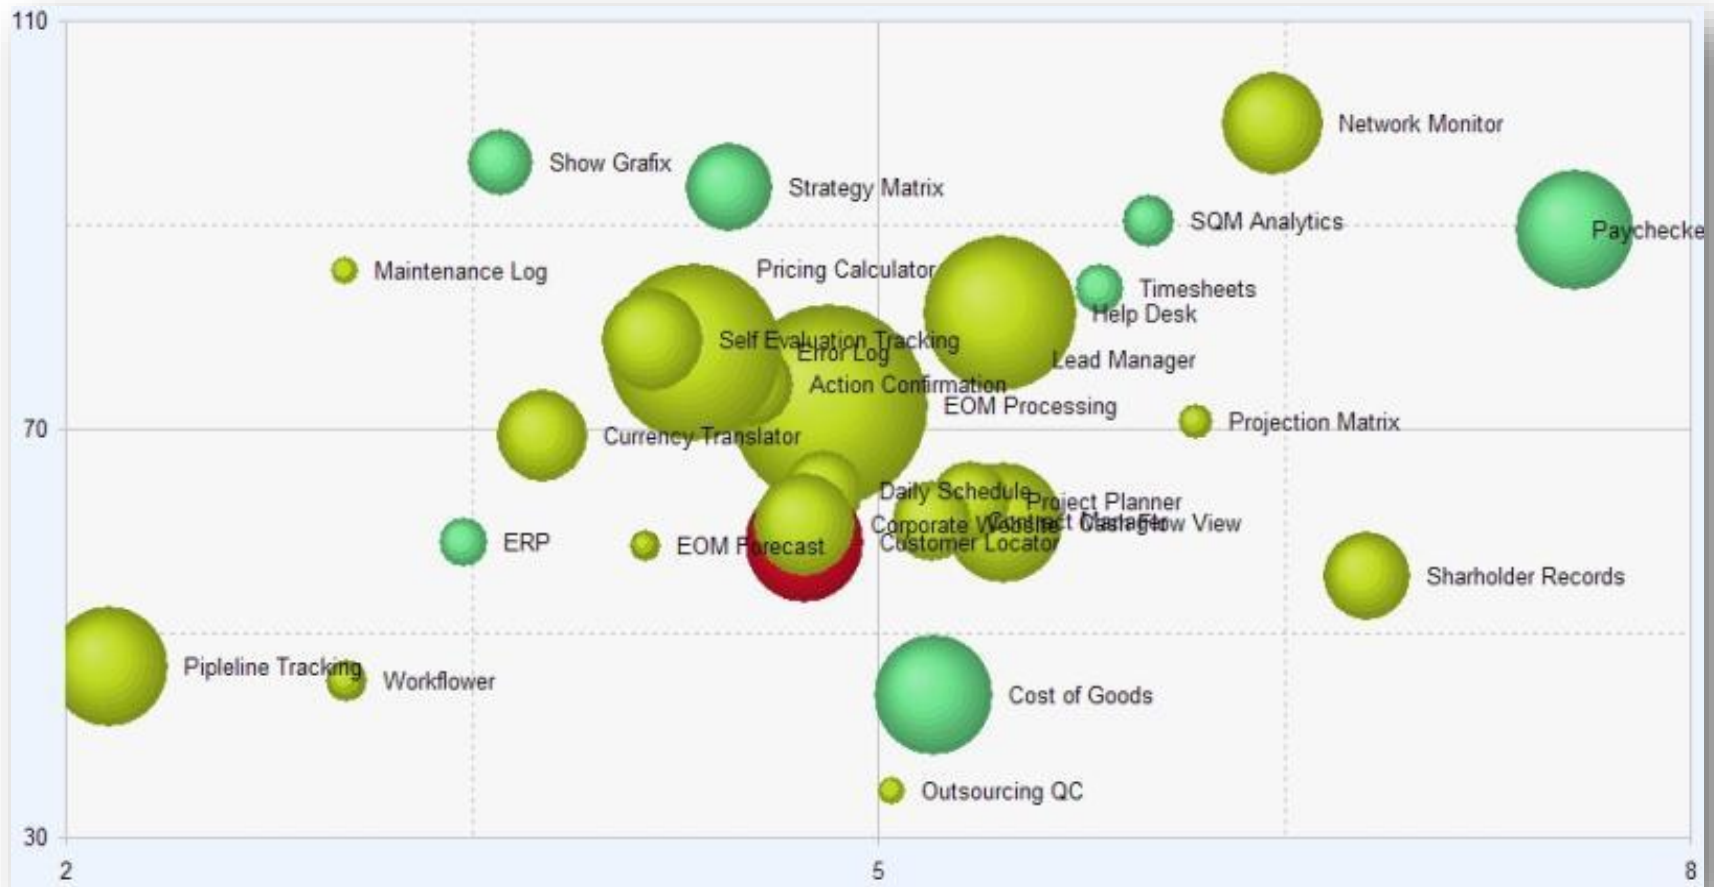

Hot tips to encourage prioritizing

- ❑ Set up the rules long before you try prioritizing live projects
- ❑ Create a metric for determining what makes a high vs. low project – not a subjective opinion
- ❑ Define a referee for any desired exceptions before the process is implemented. Get agreement that the referee's word is final (“we don't argue balls and strikes”)
- ❑ Get senior management support early on. There are bound to be concerns as the process is implemented. Make sure you've got the backing you need before they arise.

Project Portfolio Management (or is it Portfolio Project Management?)

Common pitfalls

- ❑ No project planning for the project portfolio system
- ❑ No requirements or scope established
- ❑ It's all about technology – once it's installed, the problem is solved!
- ❑ No budget allocated
- ❑ No executive sponsor support or too short term

User Resistance

In completed EPM deployments, what challenges were experienced as an “extremely” or “somewhat challenging” aspect of deployment?

Challenge	Percent experienced
Culture change (user resistance)	100%
Lack of knowledge on EPM system and requirements	100%
Executive sponsorship	80%
Importance of PM to the Organization	60%
Long-term funding	60%
Current state of PM processes and practices	40%
Technological capabilities	40%
Competing initiatives	40%

*Preliminary Results of [EPM System Implementation Benchmark Survey](#), Center of Business Practices, 2004

Some *more* Pitfalls

- Real Time Project Management
- Dashboard madness
- Big Bang Deployments

Real Time Project Management

Real Time Project Management

Baseline →

← Actual

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

So, if it's not real time, how real is it?

- How often should you review your business priorities?
- How often should you change priorities?
- There is a cost to change
- How fast can you make strategic level decisions
- What about projects in progress?

The background features several flowing, wavy lines in various shades of blue and white. A prominent dashed line curves across the upper portion of the image. The overall aesthetic is clean and modern.

PITFALL AVOIDANCE

Avoiding the pitfalls

What we see most often:

- No charter
- No schedule
- No executive sponsor
- No budget except for software
- No dedicated team
- No success metrics
- No expectation of changes in culture

Change Management is key

- ❑ Some of the challenges you'll face include:
- ❑ Acceptance of centralized standards and who gets to make them
- ❑ Creating a common coding structure so data comes together
- ❑ Convincing everyone to participate
- ❑ Convincing management to support the project long-term

Overcoming change resistance

- Tools in your arsenal?
 - You control the display
- Have a plan and manage like a project
- Have management sponsorship
- Return on investment for each type of user
 - People will need to invest time and effort – what will they get back?

Overcoming change resistance

- ❑ Become the path of least resistance
 - ❑ Templates
 - ❑ Do it manually or on a white board so everyone can follow the process and not blame the software
 - ❑ Easy to follow process
- ❑ Consider objections and ways you can overcome them.
 - ❑ e.g.:
 - ❑ Consider a temporary amnesty
 - ❑ Consider establishing rules for project prioritization
- ❑ Communicate, communicate, communicate
 - ❑ Seminars, lectures, white papers, presentations

Overcoming Change Resistance

- ❑ Get sufficient authority and then impose the change
 - ❑ How can employees thwart this method?
- ❑ Be democratic, take a majority vote
 - ❑ What are the negative implications of this?
- ❑ Trim-tab

Buckminster Fuller

□ Who was Bucky Fuller?

Buckminster Fuller

□ Who was Bucky Fuller?

In 1927 Fuller resolved to think independently which included a commitment to "the search for the principles governing the universe and help advance the evolution of humanity in accordance with them... finding ways of doing more with less to the end that all people everywhere can have more and more."

Turning the ship

Queen Mary 2

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

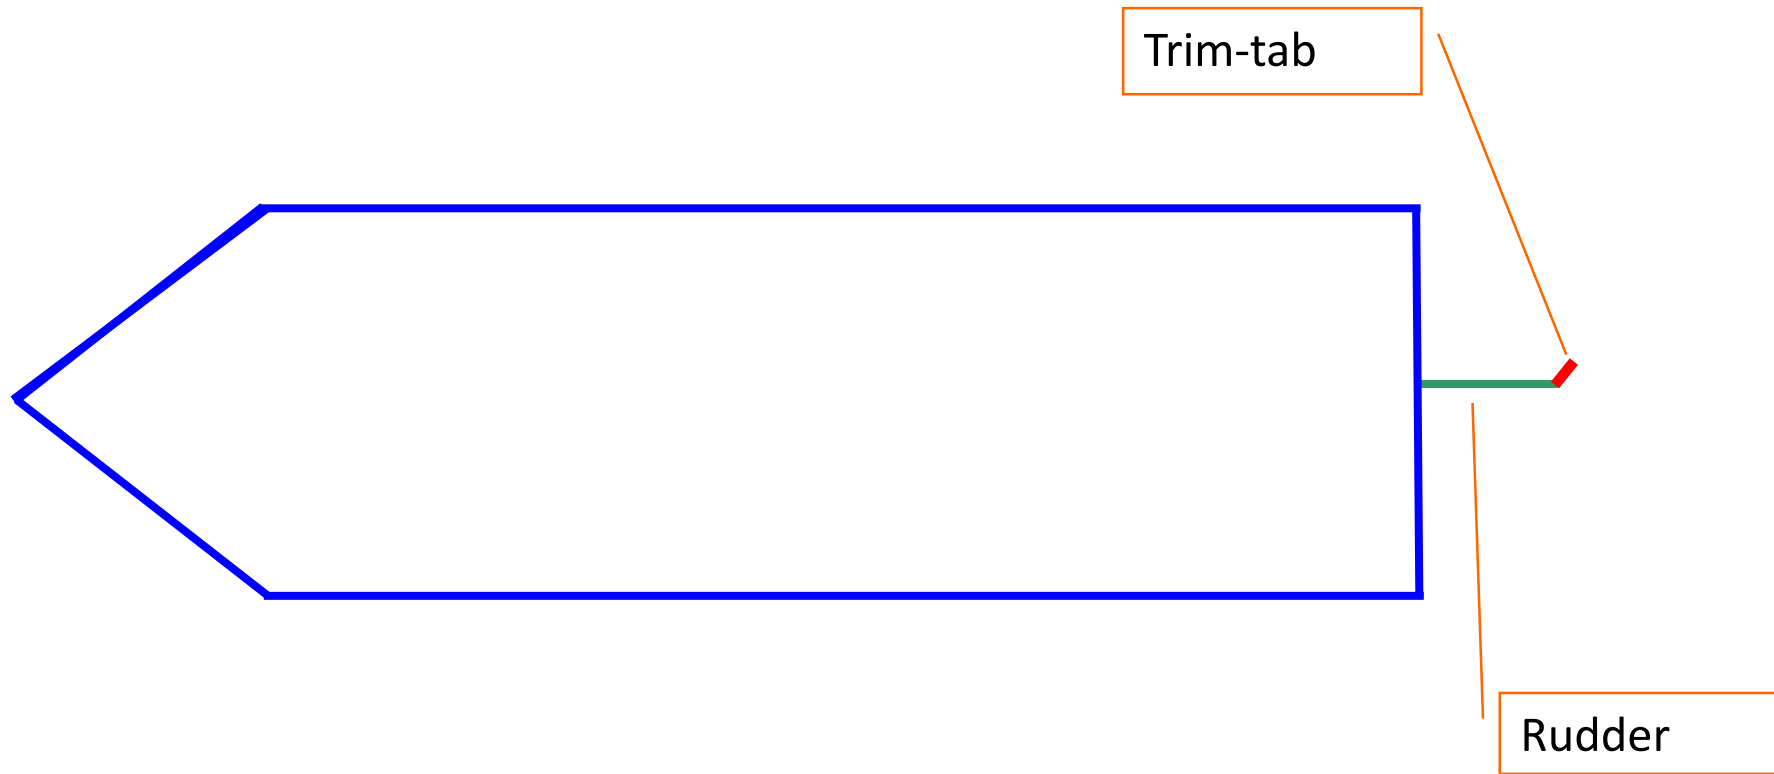

Ship Rudder

Business Prioritization Workshop

© 2015 EPMGuidance.com and Chris Vandersluis

Buckminster Fuller's Trim Tabs

Trim Tabs

“Something hit me very hard once, thinking about what one little man could do. Think of the Queen Mary—the whole ship goes by and then comes the rudder. And there's a tiny thing at the edge of the rudder called a trim tab. It's a miniature rudder. Just moving the little trim tab builds a low pressure that pulls the rudder around; takes almost no effort at all.

“So I said that the little individual can be a trim tab. Society thinks it's going right by you, that it's left you altogether. But if you're doing dynamic things mentally, the fact is that you can just put your foot out like that and the whole big ship of state is going to go.”

“So I said, call me ‘Trim Tab’.”

Buckminster Fuller

Bucky's gravestone

Creating your PPM environment

1. Define what PPM is and should be to the organization
2. Define the business drivers
3. Agree on the questionnaires and their answers
4. Get agreement for the process not the results
5. Activate, monitor and adjust
6. Automate

The background features abstract, flowing wavy lines in various shades of blue and white, creating a sense of movement and depth. The lines are layered and curved, with some appearing as solid bands and others as dashed or semi-transparent paths.

WRAPPING UP

**WHAT HAVE BEEN YOUR
TAKE-AWAYS FROM
TODAY'S SESSION?**

Wrapping up

We've discussed:

1. What is Project Portfolio Management?
2. Defining a Project Selection Process
3. Deploying Business Prioritization Process
4. Pitfalls and Sinkholes
5. Pitfall Avoidance

A battle plan lasts, until
contact with the
enemy.

Napoleon Bonaparte
